Professional Summary

Results-oriented Frontend React Developer with 2+ years of experience building secure, high-performance fintech, e-procurement, and healthcare web applications. Strong expertise in building modular, reusable UI components using React, TypeScript, and Tailwind CSS. Proven track record of designing scalable state management using Redux Toolkit and React Query, optimizing application loading speeds, and implementing real-time WebSockets. Expert in Git collaboration, browser debugging, and leading small feature teams to deliver clean, production-ready code.

Skills

- **Languages & Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **State Management & Data fetching:** Redux Toolkit, React Query (TanStack Query), Context API, Axios
- **Component Styling Systems:** Tailwind CSS, Material UI (MUI), shadcn/ui, Bootstrap
- **Real-Time APIs:** WebSockets, Stomp.js, REST APIs integration, JSON Schema validation
- **Forms & Validation:** React Hook Form, Zod schema validation
- **Performance Optimization:** Code Splitting, Lazy Loading, React.memo, virtualization, rendering cycle management
- **Backend Basics Tools:** Node.js, Express.js, MongoDB, Postman, Git, GitHub

Experience

React JS Developer

Oct 2024 – Present

Lincpay Solutions Pvt. Ltd

Bhopal, India

- **PsychUp – Mental Health Assessment Platform (Team Lead)**
- Coordinated a small team of frontend developers to architect a secure, multi-role web platform (Admin, Organization, Therapist, Patient) featuring protected routes, role-based access, and token lifecycle management.
- Engineered a dynamic timed test engine with automated scoring logic and custom report generation for patient evaluations.
- Designed client-server state architecture combining Redux Toolkit (for global state) and React Query (for server caching), minimizing redundant API network requests by 40%.
- Improved Lighthouse performance score and cut initial page load times by 30% by implementing custom code-splitting, bundle chunking, and lazy loading strategies.
- Enforced strong code quality standards through strict Git workflows (feature branching, rebasing, pull requests) and peer reviews, reducing UI bugs in production.
- **E-Procurement & Live Auction Engine**
- Developed scalable modules for bidding lifecycles, including multi-step vendor registration, live bid displays, and tender document upload workflows.
- Architected a real-time live bidding dashboard using WebSockets (Stomp.js) combined with optimized custom React hooks, reducing rendering delays and ensuring sync under high-concurrency peak traffic.
- **Merchant Payment Panel**
- Built an interactive merchant panel for Pay-in/Payout tracking, featuring live financial analytics, transaction status tables, and dynamic CSV/PDF reconciliation reports.
- Implemented a secure, responsive merchant KYC onboarding flow utilizing React Hook Form and Zod validation, boosting successfully completed onboarding registrations by 25%.

Freelance Web Developer

Oct 2023 – July 2024

Remote

- Developed responsive, SEO-optimized landing pages and customized React.js web applications for local and small businesses.
- Created high-quality, reusable component libraries tailored for mobile-first layouts, improving site loading speed and layout responsiveness across devices.

Education

MCA – SGSITS, Indore

2021 – 2023

BCA – NRI Institute of Technology, Bhopal

2016 – 2019
